

Fabrications

Skilled craftsmen to handle all your fabrication needs!

Metal fabrication including shearing, forming, welding and leak testing. All types of materials including aluminum and stainless steel

Engineering

Complete engineered packages including Bill Of Materials and maintenance manuals

Electrical Controls

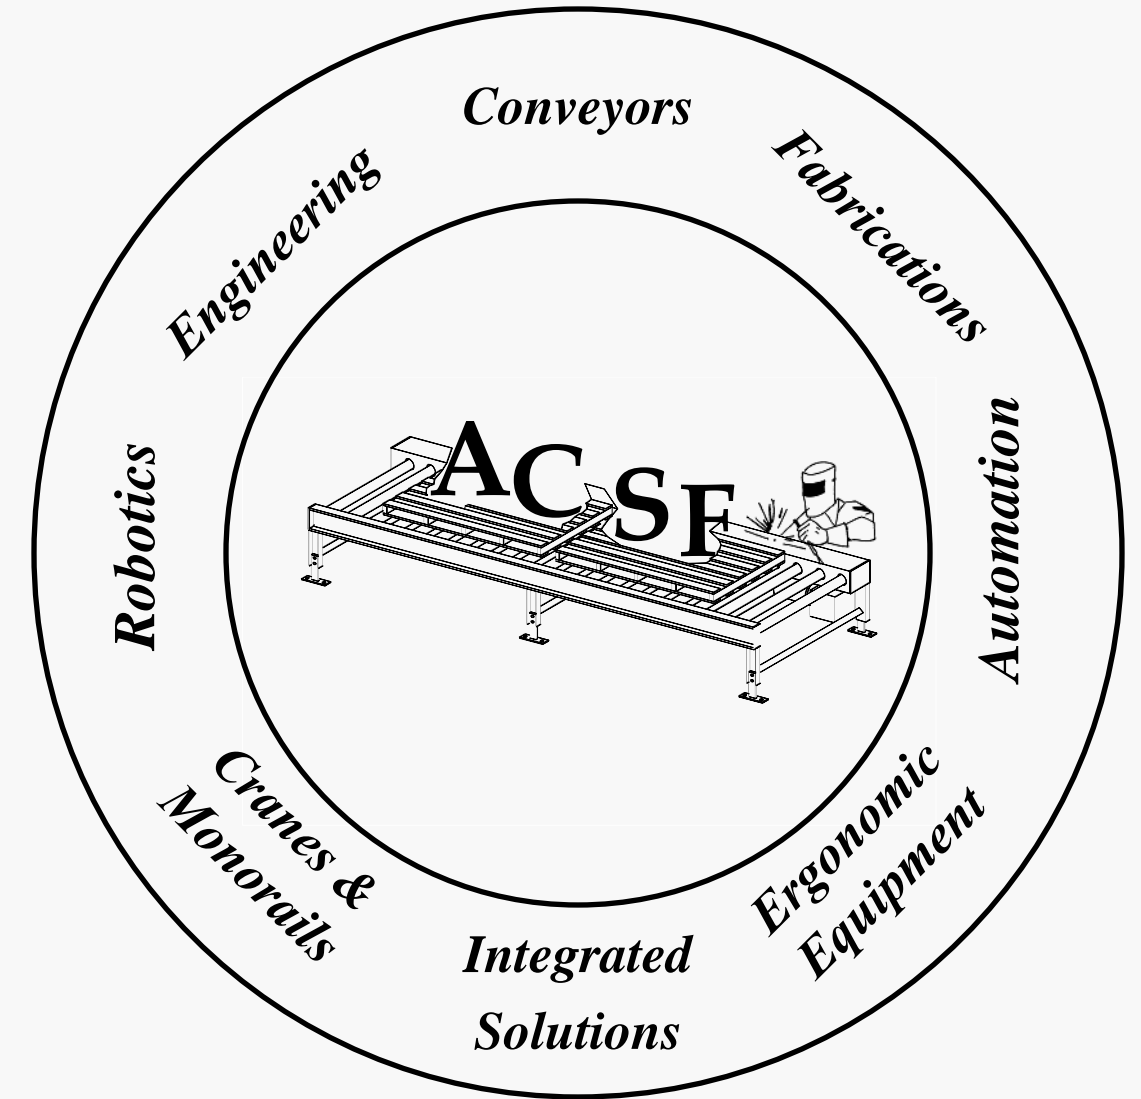

ASCF uses state-of-the-art software and equipment to design your electrical and controls interface. Our electrical/control department can build, program, install and de-bug an individual piece of equipment or a complete system.

Advanced Conveyor Systems & Fabrication

*ACSF is the center of
Turnkey Material Handling Solutions*

www.acsfinc.com

Ergonomically engineered solutions to meet our customer's unique needs!

4 lane gravity conveyor with pop-up drag chain for zone accumulation

90 Degree 3 strand lug transfer, Belt driven live roller conveyor, Roller bed belt conveyor with Pneumatically actuated diverter.

ACSF can solve all your unique product orientation requirements!

Robotic Cells with Infeed and Discharge Conveyors including interlocking safety fencing

Ergonomic equipment for increased productivity and worker safety!

Gravity over/under conveyor system to maximize storage and space requirements

Specialty material handling turn/tilt table increases production while solving ergonomic challenges

Pallet handling / Indexing

Flatboard processing system w/ smart crane technology

Stainless steel "wash-down duty" table top conveyor for frozen foods

Overhead powered chain conveyor w/part handling baskets.

Part storage silo, part escapement and elevator

Table top chain conveyors with metal detection for the food and drug industries

Sanitary belt conveyors for raw food products
